

ACTIVEHAND®

CRAFTSMEN'S GLOVE

BRAND STORY

The mankind have invented so much for its survival and improvement since the beginning of time. Created spears to hunt, made walls for shelter. We invented so many tools to satisfy our needs and these inventions led to the significant improvement of our wit and experience.

Our hands were the best tools we had along this journey. Those skilled hands of master's created the work of arts that shaped our society which we still admire to this day. Then came Industrialization which opened so many paths for us to further use our hands to shape our future. These hands held those little hands, transferred the love we.

ACTIVEHAND

ABOUT ACTIVEHAND

We have founded Activehand in 2017 to reflect our years of expertise in business and create an ambitious, successful brand that contributes and improves our society.

Starting this journey with the idea of manufacturing the best safety gloves, we had the honor of building the first polyurethane line of our country in 6 months for the production of our Activehand gloves.

As soon as we started producing Activehand safety gloves, we've added cut protection gloves to our product range and diversified our products with polyurethane coating, nitrile coating and nitrile foam coating to meet our customers needs from every industry.

We are buying the best raw materials from the best suppliers to ensure the high quality.
